Skills

React

Redux

CSS/Modules/SASS/CSS-in-JS/CSS-in-HTML

React Testing

Full Stack Web Developer (with a strong preference for the frontend) and Tech Lead. I have also worked in DevOps (I have 2 AWS associate certifications & experience building CI/CD pipelines). I've also worked in QA (including writing automated end to end and API tests).

Work History

2021-09 –
now

Senior Front End Developer | Tech Lead

Checkbox, Sydney, NSW

- Architected full-stack technical design for new features and user workflows.
- Built new React UI with Redux in the primary B2B application.
- Implemented automated end to end and API tests (in CypressJS).
- Implemented migration from JavaScript to TypeScript on the frontend.
- Implemented mass-adoption of unit/integration tests on the frontend with Jest and React Testing Library.
- Trained/mentored junior engineers in React/frontend best practices (in areas like performance optimization and testing).
- Implemented agile team processes to reduce process ambiguity and improve consistency of team output.
- Influenced future product feature roadmap and technical architecture decisions.
- Added many new and old UI components to the Storybook.js design system.
- Built and modified Go (Golang) APIs.

2021-03 -
2021-09

Full Stack Web Developer

oOh!media, Sydney, NSW

- Built new features into internal React & Redux applications.
- Gave comprehensive React training to mid & senior-level engineers.
- Built evergreen internal UI design system using Storybook.js.

Excellent

Accessibility / WCAG

Excellent

Web Sockets

Very Good

Automated End2End Testing

Good

Storybook (UI Design Systems)

Excellent

Figma (Design/Wireframe Prototyping)

Good

Node/Express

Excellent

AWS

Very Good

Building REST APIs

Excellent

Building GraphQL APIs

Good

SQL Databases

Very Good

NoSQL Databases

Very Good

VueJS

2018-08 -
2021-02

Full Stack Web Developer

Telstra, Sydney, NSW

- Performed full stack development of a Telstra enterprise web application with thousands of internal users utilizing the MERN (MongoDB, Express, React, Node) stack with redux. The primary feature of this application is a catalogue of charts displaying data from various sources. I built new features into this application every day. Some examples include allowing the users to query databases from within the application, automatically schedule user-written scripts against databases, set up monitoring & alarms, and many more. The application uses a microservices architecture and is deployed on AWS.
- Troubleshooted operational issues in AWS core services such as CloudWatch, EC2, ECR and DocumentDB.
- Containerized many applications using Docker.
- Configured NGINX reverse-proxies to forward requests to various servers/micro-services-in-docker-containers.
- Wrote unit tests using Jest.js, Enzyme.js and React Testing Library.
- Set up CICD pipelines using Atlassian's Bamboo platform.
- Documented many APIs using Swagger/OpenAPI specification.

IT Consultant

KPMG, Sydney, NSW

Good

Angular

Good

Languages

JavaScript

Excellent

TypeScript

Excellent

Python

Very Good

Go

Good

Education

2013-02 -
2016-11

Bachelor of Science: Engineering

Sydney University - Sydney, NSW

Certifications

2021-07

AWS Certified Solutions Architect - Associate

2021-03

AWS Certified Developer - Associate

Interests

- Improving developer experience (I'm quite proactive on updating documentation and innovating with new team processes)
- Mentoring
- Leadership
- System architecture
- Web app performance
- UX Design
- Accessibility
- DevOps/Cloud/Serverless
- AI/Machine-Learning
- Staying up to date with the latest technologies, trends, and best practices.

Hobbies

- Ice Skating
- Cricket
- Hiking
- Running
- Reading
- Tech Meetups
- Traveling
