WORK EXPERIENCE

oOh!media, Sydney

March 2021 – Now

Full-Stack Web Developer

- Fixed bugs and built new features into internal React & Redux application.
- Built new features into python API servers.
- Enhanced features in and maintained Node-Express.js & GraphQL servers.
- Personally took ownership of 2 AWS Lambdas.
- Built evergreen internal UI design system using Storybook.js. This is hosted on AWS S3 and is used by multiple stakeholders (e.g. designers, developers, product owners/managers, etc.) to standardize UI/UX across different internal web applications.

Telstra, Sydney

August 2018 – February 2021

Full-Stack Web Developer

- I performed full-stack development of a Telstra enterprise web application with thousands of internal users utilizing the MERN stack with redux. The primary feature of this application is a user-browsable catalogue of charts displaying data that is regularly queried from their sources.
- I built new features into this web application every day, such as the ability to allow users to query databases from within the application, run user-written scripts and schedule them to query and validate data from desired databases, setting up automated data-monitoring & alarms, and many more. The application is using a microservices architecture to integrate many disparate web apps into a single one-stop shop which is being deployed on AWS.
- Go to <https://avu120.github.io/portfolio/#portfolio> then click on the Telstra logo to see an overview of most of the work I have done at Telstra.
- I used AWS core services such as EC2, ECR and DocumentDB to troubleshoot operational issues and maintain operation of the deployed application.
- I have containerized many applications using Docker.
- I have configured NGINX reverse-proxies to forward requests to various servers/micro-services-in-docker-containers.
- I have written unit tests using Jest.js, Enzyme.js and React Testing Library.
- I have written integration tests using ROBOT test framework.
- I have set up and maintained CICD pipelines using Atlassian's Bamboo platform.
- I have documented many APIs using Swagger/OpenAPI specification.
- I have automated the deployment of network configuration and virtual network devices using ansible playbooks.
- I have automated traffic monitoring of Telstra's mobile networks through the creation and use of Tableau dashboards.

KPMG, Sydney

February 2017 – May 2018

Management Consultant (IT Advisory & Assurance)
