## Skills

React

Redux

CSS/Modules/SASS/CSS-in-JS/CSS-in-HTML

React Testing

Full Stack Web Developer (with a strong preference for the frontend) and Tech Lead. I have also worked in DevOps (I have 2 AWS associate certifications & experience building CI/CD pipelines). I've also worked in QA (including writing automated end to end and API tests).

## Work History

2021-09 –  
now

### Senior Full Stack Web Developer | Tech Lead

*Checkbox, Sydney, NSW*

- Architected full-stack technical design for new features and user workflows.
- Built new React UI with Redux in the primary B2B application.
- Built new and modified existing Go (Golang) APIs.
- Implemented automated end to end and API tests (in CypressJS).
- Implemented migration from JavaScript to TypeScript on the frontend.
- Implemented mass-adoption of unit/integration tests on the frontend with Jest and React Testing Library.
- Trained/mentored junior engineers in React/frontend best practices (in areas like performance optimization and testing).
- Implemented agile team processes to reduce process ambiguity and improve consistency of team output.
- Influenced future product feature roadmap and technical architecture decisions.
- Added many new and old UI components to the Storybook.js design system.

2021-03 -  
2021-09

### Full Stack Web Developer

*oOh!media, Sydney, NSW*

- Built new features into internal React & Redux applications.
- Gave comprehensive React training to mid & senior-level engineers.
- Built evergreen internal UI design system using Storybook.js.

Excellent

Accessibility / WCAG

Web Sockets

Automated End2End Testing

Storybook (UI Design Systems)

Figma (Design/Wireframe Prototyping)

Node/Express

AWS

Building REST APIs

Building GraphQL APIs

SQL Databases

NoSQL Databases

VueJS

2018-08 -  
2021-02

## Full Stack Web Developer

*Telstra, Sydney, NSW*

- Performed full stack development of a Telstra enterprise web application with thousands of internal users utilizing the MERN (MongoDB, Express, React, Node) stack with redux. The primary feature of this application is a catalogue of charts displaying data from various sources. I built new features into this application every day. Some examples include allowing the users to query databases from within the application, automatically schedule user-written scripts against databases, set up monitoring & alarms, and many more. The application uses a microservices architecture and is deployed on AWS.
- Troubleshooted operational issues in AWS core services such as CloudWatch, EC2, ECR and DocumentDB.
- Containerized many applications using Docker.
- Configured NGINX reverse-proxies to forward requests to various servers/micro-services-in-docker-containers.
- Wrote unit tests using Jest.js, Enzyme.js and React Testing Library.
- Set up CICD pipelines using Atlassian's Bamboo platform.
- Documented many APIs using Swagger/OpenAPI specification.

## IT Consultant

*KPMG, Sydney, NSW*

2017-02 -  
2018-05

Good

Angular

Good

## Languages

JavaScript

Excellent

TypeScript

Excellent

Python

Very Good

Go

Good

Java

Good

C++

Good

## Education

2013-02 -  
2016-11

**Bachelor of Science: Engineering**

*Sydney University - Sydney, NSW*

## Certifications

2021-07

**AWS Certified Solutions Architect - Associate**

2021-03

**AWS Certified Developer - Associate**

## Interests

- Improving developer experience (I'm quite proactive on updating documentation and innovating with new team processes)
- Mentoring
- Leadership
- System architecture
- Web app performance
- UX Design
- Accessibility
- DevOps/Cloud/Serverless
- AI/Machine-Learning
- Staying up to date with the latest technologies, trends, and best practices.

## Hobbies

- Ice Skating
- Cricket
- Hiking
- Running
- Reading
- Tech Meetups
- Traveling
